Cricket Player Performance Tracking System

1. Introduction

The Cricket Player Performance Tracking System is a software application designed to record, analyze, and monitor the performance of cricket players. The system helps coaches, teams, and analysts track player statistics such as batting, bowling, fielding, and match performance. This project helps in making data-driven decisions for team selection, player improvement, and match strategy planning.

2. Project Modules

User Management Module:

- User registration
- Login and authentication
- Role management (Admin, Coach, Analyst)

Player Management Module:

- Add, update, delete player details
- View player profiles

Match Data Entry Module:

- Enter match details
- Record runs, balls faced, wickets, overs, catches

Performance Analysis Module:

- Batting average calculation
- Bowling economy rate
- Strike rate analysis
- Player ranking

Report Generation Module:

- Match reports
- Player performance reports
- Team statistics

3. Project Scheduling Timeline

Phase 1: Requirement Analysis – 1 Week

Phase 2: System Design – 1 Week

Phase 3: Database Design – 1 Week

Phase 4: Module Development – 3 Weeks

Phase 5: Testing – 1 Week

Phase 6: Implementation & Documentation – 1 Week

Step 3. Define the summary calculation

Select Object to Summarize

Master Object: Player
Summarized Object: Match Performances

Select Roll-Up Type

- COUNT
- SUM
- MIN
- MAX

Field to Aggregate: --None--

Filter Criteria

- All records should be included in the calculation
- Only records meeting certain criteria should be included in the calculation

4. Project Levels

Level 1 – Basic System:

Player data entry and match statistics storage.

Level 2 – Intermediate System:

Performance comparison and report generation.

Level 3 – Advanced System:

Data visualization, ranking system, advanced analytics.

5. Advantages

- Tracks player performance accurately
- Helps in team selection decisions
- Saves time compared to manual records
- Provides statistical insights
- Helps coaches analyze strengths and weaknesses

6. Disadvantages

- Requires accurate data entry
- Initial setup takes time
- Needs regular database maintenance
- May depend on internet if deployed online

7. Conclusion

The Cricket Player Performance Tracking System helps teams and coaches analyze player performance effectively. By maintaining accurate statistics and reports, the system improves decision-making and supports player development in modern cricket analytics.
